

Clinical Support Division

Centralized Credentials Quality Assurance System (CCQAS)

What It Is...

CCQAS

CCQAS is a Military Health System Web-based, worldwide credentialing, privileging, risk management and adverse actions application supporting medical personnel readiness.

Ensuring the Right Provider for the Right Job

Key Features and Benefits

- Captures, stores, maintains and reports on medical malpractice claims, incidents disability claims and adverse actions
- Maintains the credentials records of direct-care providers
- Automates the provider's application for privileges
- Allows providers to apply for privileges electronically
- Allows for the electronic workflow for review, routing and approval of provider privileges

Highlight

- *CCQAS became CAC enforced on November 2011.*
The Department of Defense mandate, allows users to sign-in using CAC cards without using username and mandatory password.

What Users Are Saying...

“This should not require much training and therefore it meets my expectations.”

“Always available whenever I have had a need for it.”

“I am able to get the job done.”

“Has always been available the few times I have used it.”
